Summary

Cross-Platform App Developer with 1 year of experience building engaging apps using Flutter. Competitive programmer. Skilled in development and UI/UX design principles.

Projects

E-Commerce application | Flutter

Developed a RESTful API-driven e-commerce application, using feature-first design system. Utilized GetX for state management and Git/GitHub for version control.

GitHub

Task management application | Flutter

Developed a task manager with RESTful CRUD APIs, adhering to N-Tier architecture. Implemented state management using GetX, with Git/GitHub for version control and Postman for testing.

GitHub

News paper application | Flutter

Developed a newspaper application using free APIs and N-Tier architecture. Employed Git/GitHub, Postman, and Figma for development, testing, and design.
